Check all that apply if yes for each condition and add any comments, as applicable.	Is this condition HIV related?	Is this condition a comorbidity or complication related to HIV?	Are there evidence-based interventions to combat HIV?	Does addressing the condition promote viral suppression?	Does addressing the condition improve quality of life?	For this condition, will a diagnostic procedure be required ?	If a diagnostic/treatment procedure is required, will any of the following be needed:				
Definition of terms sample based on American Society of Anesthesiology							Anesthesia for surgeries in which you lose consciousness e.g. open-heart .	Sedation for minimal invasive procedures e.g. colonoscopy.	Anesthesia for region such as those used during childbirth, or nerve-blocks.	Anesthesia for local procedures such as stitches, mole removal that numbs a small area.	No conditions/treatments are covered by the RWP if: requiring inpatient hospitalization, are performed at an emergency room or at urgent care facilities, and use general anesthesia.
